SOLUTIONS FOR
LOGISTICS PROJECTS

Overview

Gate assignment & auxiliary facilities

Order picking systems

Visualisation systems

Directions & Warnings

Weight display for truck scales

Truck queuing

Parking management
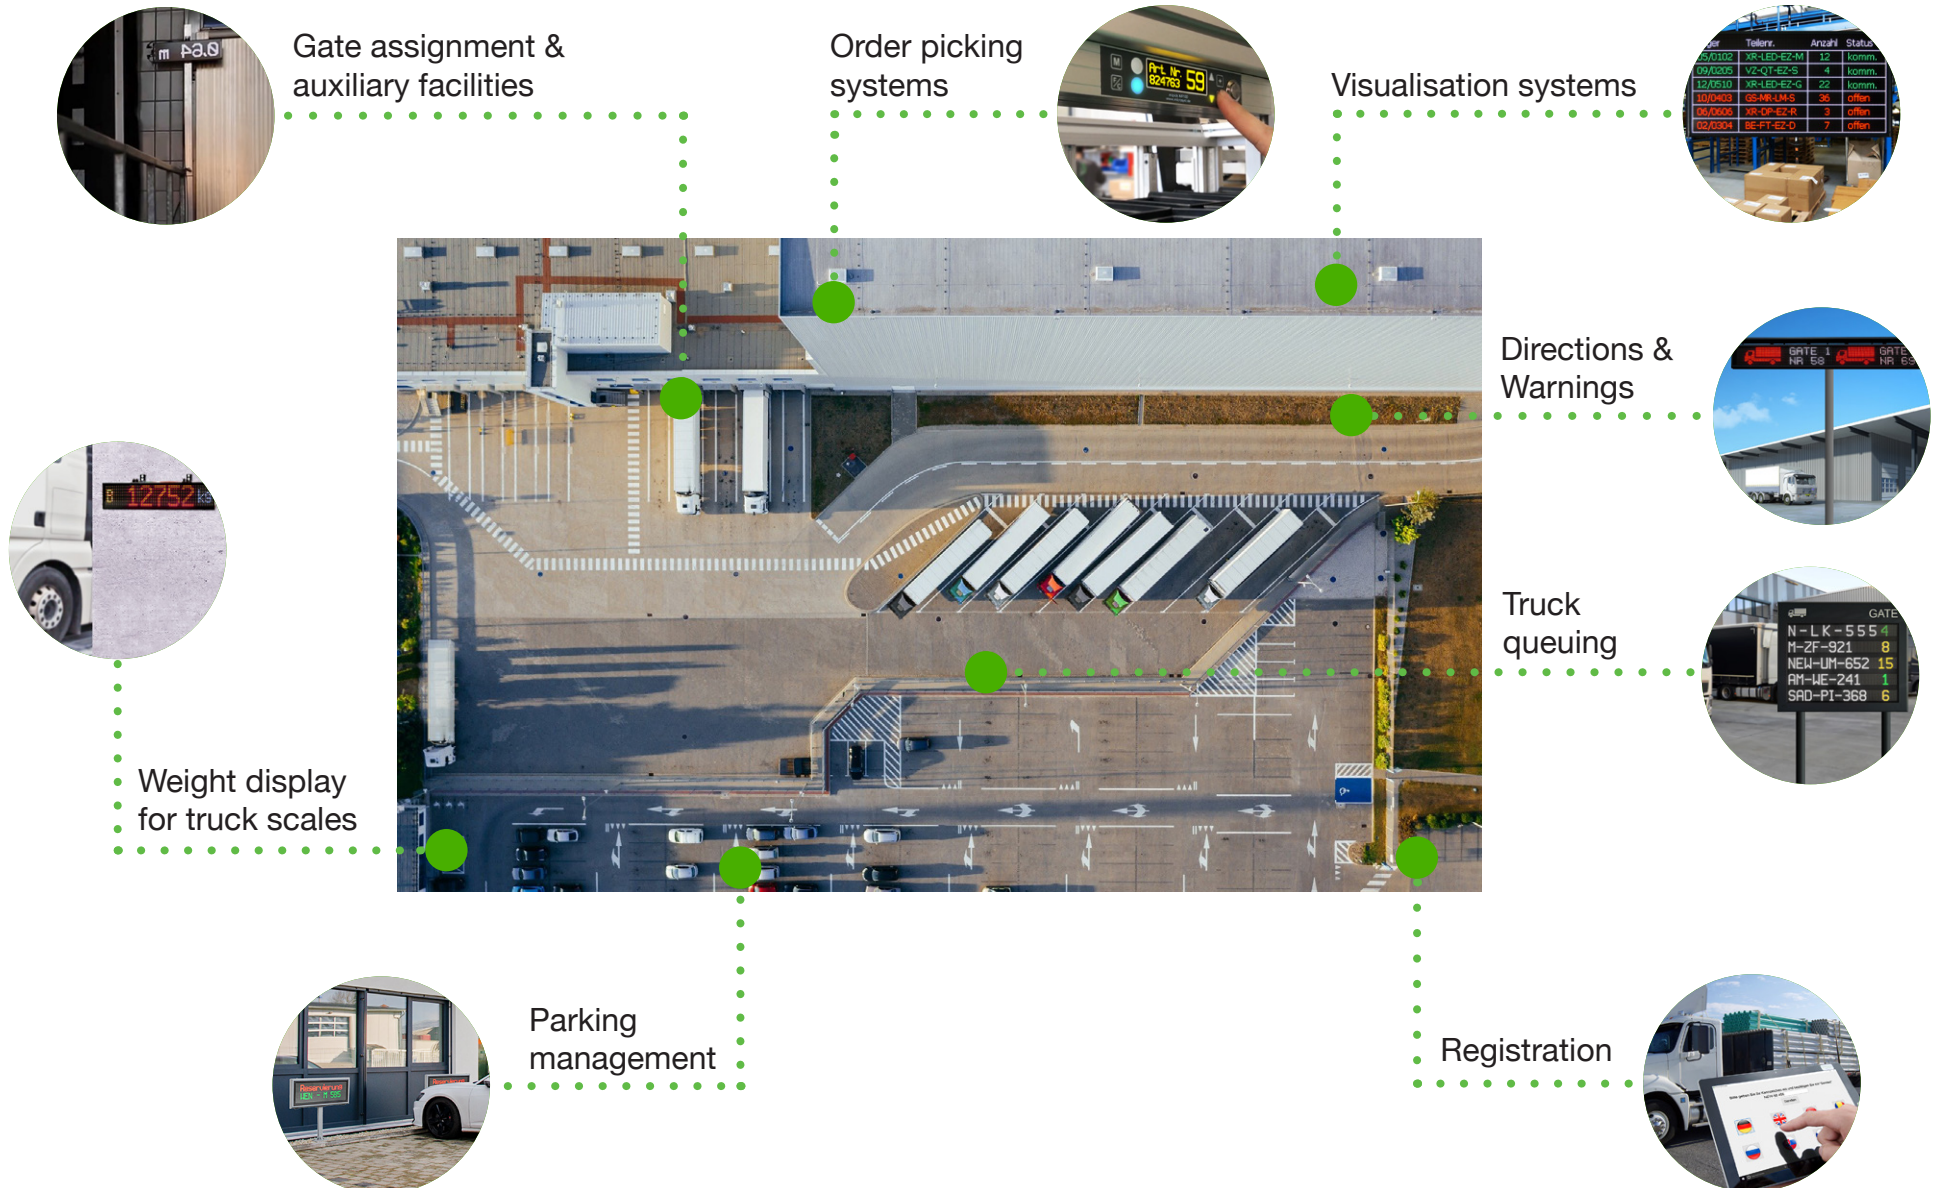

Registration

General information

Electronic parking space management

- Dynamic parking space allocation
- Clear and bright
- Simple operating software
- Durable, maintenance-free system

Registration for truck queuing

- Simple entry of login data for tablet / PC
- User-friendly, intuitive operation in various languages

Truck queuing process

- Stand-alone system or connection to customer system
- Smart operating software for truck calling
- Simple, flexible call management
- Individual visualisation and display size

For further information please
visit our website at
www.microsyst.com

General information

Directions & Warnings
- Information just-in-time
- Acceleration of lead times through targeted visualisation
- For indoor and outdoor use

Weight display for truck scales
- Optimisation of the loading processes through direct display of the loading weight
- Simple connection to the scale system via common interfaces
- High-luminosity and high-contrast for ideal readability

Gate Assignment & Auxiliary Facilities
- Clear information in real time
- Support in the loading process and avoidance of accidents, e.g. through distance indicators on the ramps
- Maintenance-free, durable electronics for 24/7 use

For further information please visit our website at www.microsyst.com

General information

Order picking systems „made in Germany"

Pick-by-Light picking systems
- Stand-alone system or connection to customer system
- Various pick displays and extensions available
- Increased picking performance and reduced error rate
- Robust aluminium housing and maintenance-free system

Light position indicators
- Paperless order picking with light position indicator for every location
- Reduce the error rate through clear identification
- Hands-free order picking due to automatic acknowledgement
- High-quality manufacturing and maintenance-free system

Barcode scanner
- Paperless picking with barcode scanner
- Reduce picking errors through clear identification of the items to be picked
- Reduce picking times thanks to paperless picking
- Maintenance-free, robust system

For further information please visit our website at www.microsyst.com

General information

Visualisation systems „made in Germany"

Large format LED displays
- Modular system design for customised LED displays
- Suitable for industrial use 24/7 and with up to 16.7 million luminous colours
- Special equipment for various areas of application
- For indoor and outdoor use

Line-oriented LED displays
- Optimised design and durable use
- Bright displays with up to 7 luminous colours
- Combination of several displays for multi-line representations
- Range of functions can be extended as required with various additional components
- For indoor and outdoor use

TFT industrial monitor
- High-resolution LCD display with high contrast
- Brilliant displays in 16.7 million luminous colours
- Simple control via PC
- For permanent use in industrial environments
