DISPLAY SYSTEMS
FOR TRUCK SCALES

General information

Hardware

Customised display for optimal readability at up to 100 metres (e.g. display dimensions 100 x 16 cm with character height 12 cm / reading distance 50 metres)

For indoor and outdoor use with high-contrast LEDs, brightness sensor and large reading angle

Clear display thanks to 7-colour LED display technology and single or multi-line display
Display with **traffic light function**

Dust-protected version for use in rough surroundings

Mounting for wall, pole or ceiling installation

Optional **vibration-protected** mounting and **stainless steel housing** depending on customer requirements

General information

Software

Simple connection to scale system via industrial interfaces
Adaptation to the existing data protocol of the scales

Smart configuration of the visualisation, formatting of the values possible e.g. flashing when a value is exceeded

Easy change of the weight unit, e.g. kg, t, by displaying with the LED matrix display

Configuration software for truck scale display

Your benefits

- **Clear information in real time**
Visualise the measured values of your truck scale and speed up your loading process - thanks to direct display of the loading quantity in real time!
- **Optimise the loading processes**
By displaying the loading quantity, you avoid overloading and provide drivers with clear information.
- **Maintenance-free durable technology for 24/7 use**
High-quality, weather-resistant and fanless technology made in Germany - and a reliable, robust system for you!

Examples of possible applications

Weight display with symbol for correct loading

Display of the truck weight on a line-oriented display

Weight display with symbol and indication of overloading

Weight display with traffic light display and loading indication
